# 2026 Rehost Digital Impact Grant

Turn an app, portal, website, or business tool into something people can use. If approved, the grant may cover the agreed first version and reduce monthly costs after launch.

## Why Is This Available?

The Digital Impact Grant combines public and private funding to help eligible businesses, local governments, and community organizations build or replace useful software. Rehost participates as a contracted delivery partner for approved projects.

## Who It Is For:

- Small and medium-sized businesses or LLCs that mainly serve clients in the United States.
- Cities, municipalities, and local government agencies.
- Local nonprofits, community organizations, and other public-serving organizations.
- Projects that help a business serve customers or provide a clear local benefit.

## What You Get:

- **A dedicated team:** A product manager and vetted developers plan, build, and launch your project.
- **A covered first version:** If approved, the grant may cover the agreed first version and launch.
- **Ongoing support:** Hosting, maintenance, updates, and continued development after launch.
- **Direct access:** Call or text your team when you need help.
- **Clear terms:** $97/month for the first 3 months, then $650/month, locked for the next 12 months. Grant eligibility, coverage, ownership, renewal, notice, and service terms are confirmed in writing. No equity is required.

## What Could You Build?

| Audience | Examples | Benefit |
|---|---|---|
| **Businesses** | Loyalty apps; customer portals; search-friendly pages; booking, ordering, or CRM systems | Serve customers, replace subscriptions, and reduce manual work |
| **Cities and local governments** | Resident portals; request tracking; resource directories; public dashboards | Make local services easier to access |
| **Community organizations** | Member or volunteer portals; training hubs; enrollment or donor systems | Serve participants and manage programs in one place |
| **Modernize what you already have:** Approved projects can update or replace websites, apps, portals, databases, and internal tools. | | |

## How It Works:

1. Tell us what you need, who it serves, and what it could replace.
2. A partner agency checks the fit, defines the first version, and prepares the formal inquiry.
3. If approved, the scope, coverage, ownership, monthly service, and launch target are confirmed in writing before work begins.
